To the Occupier

**Electricity Cable laying project - section on Cambridge Road, Ely**

**Road Re-Surfacing – Tuesday 22<sup>nd</sup> August 09:00 – 19:00**

We wrote to you back in May to advise you of a cable laying project in Ely. This letter is an update on that. The work was required to increase the electricity capacity at Lancaster Way Business Park which will enable development there which will bring more businesses and jobs to Ely.

I am pleased to tell you that the installation is now complete and the cable is now live. All we need to do now is resurface the north bound carriageway. We plan to carry out this task on Tuesday 22<sup>nd</sup> August 2017. The extent of the resurfacing runs from the zebra crossing near the junction of Tower Road down to the main substation next to 12 Cambridge Road. These works will return the surface to the condition it was before the cable installation commenced.

Traffic control by stop/go boards will be in place throughout the day (09:00 – 19:00) whilst the works are being carried out under Street Works Licence SWL 1704/05 issued by Cambridgeshire County Council. No parking bays will be affected on the east side of the carriageway and every effort will be made to keep accesses and driveways open at all times on the west side. These are mobile works which will constantly be moving down the road so any blocking of accesses will be of a short duration.

We are very conscious of the potential for our works to disrupt your daily routine and we are doing everything in our power to minimise disturbance to you during these works. If you should have any need to speak with someone please don't hesitate to contact me on 07713 114739 or via email [phil.nichols@stormport.co.uk](mailto:phil.nichols@stormport.co.uk)

I would really like to apologise for any inconvenience this may cause but the work is essential to restore the road surface to its original condition.

Yours sincerely

**Phil Nichols**

Project Manager
